KEY PROJECTS

1. SettleIn – Student Support Platform MERN Stack

- Architected and implemented a full-stack web application tailored for student support services.
- Integrated secure **JWT authentication** for user login, signup, and session management.
- Designed and deployed robust RESTful APIs to handle dynamic data flow seamlessly.
- Configured and linked **MongoDB** database schema for high-availability data storage.

2. School Management System MERN Stack

- Engineered a role-based administrative management system using MongoDB, Express, React, and Node.
- Implemented full **CRUD functionality** for managing students, teachers, and course records.
- Developed an interactive, responsive dashboard optimized for multi-device access.

3. Photo Editor MATLAB

- Designed a feature-rich desktop GUI application for digital image manipulation and editing.
- Implemented customized algorithms for dynamic image enhancement, contrast adjustment, and color filtering.

4. Face Detection System MATLAB / Computer Vision

- Developed an automated face detection solution leveraging Computer Vision concepts in MATLAB.
- Processed visual input streams to accurately locate and frame facial regions in real-time environments.
